

Ansonia Shopping Plaza

Ansonia, CT

The Ansonia Shopping Plaza project was the ground-up, steel and block construction of a 90,000 square foot retail space. The project involved site preparation, excavation and forming of concrete foundations, erection of structural steel and CMU walls and EPDM roof. Our scope included the aluminum storefront, interior finishes, MEP systems and complete fixturing of a Marshalls Store and a Bob's Store ready for merchandise. We are proud of the fact the Coastal was originally referred to the developer of the Ansonia Plaza by TJX Companies Construction Department.
