

Torrington Municipal & Teachers Federal Credit Union

Torrington, Connecticut

The Torrington Federal Credit Union doubled in size and underwent a complete renovation while remaining open during the entire project. Coastal Construction worked closely with the management of the branch to accommodate their business while holding to an aggressive construction schedule.

An addition of approximately 2,500 sq. ft. was the first phase of the project. This portion included a new lobby and teller line. Once the first phase was complete, the employees relocated, the former lobby, teller line, and office space was then converted to a conference room with private renovated offices.

Torrington Municipal & Teachers Federal Credit Union Torrington, Connecticut
